Driver's License B

PROFILE

Passionate about artificial intelligence, data analysis, and software development, I have acquired strong skills in programming, automation, and data processing through my academic and personal projects. I am particularly interested in the interactions between AI and software engineering, especially in methods for effectively and reliably integrating artificial intelligence into software systems. My goal is to contribute to the design of innovative digital solutions while deepening my expertise in this field. In the long term, I aspire to establish a company specializing in digital technologies in order to contribute to strengthening digital sovereignty in Africa.

EDUCATION

2026 - 2027 **CATHOLIC UNIVERSITY OF LILLE | MASTER DATA & AI**

2023 - 2024 **UNIVERSITY OF NIMES | BACHELOR'S IN MAINTENANCE & TECHNOLOGY**
COMPUTER VISION TRACK **With High honors**

2022 - 2023 **ESMT** **BACHELOR'S IN NETWORK ADMINISTRATION & SECURITY**
With Honors

EXPERIENCE

07/01/24 - 09/24/24 **DAKAR PRINCIPAL HOSPITAL** | **IMAGE PROCESSING INTERNSHIP**

Implementation of image processing algorithms for the segmentation and detection of anatomical structures. Quantitative analysis on medical imaging data and preventive maintenance of imaging equipment

04/20/22 - 10/09/22 **FREELANCE | WEB DEVELOPMENT**

Design and development of an e-commerce site (HTML, CSS, MySQL). Creation of the user interface, product management, orders, and authentication.

06/08/26 - 08/08/26 **CBAO** | **IT PROJECT MANAGEMENT INTERNSHIP**

Consolidation, support, and monitoring of projects, as well as design of digital solutions for the management of activity reports (CRA).

PROJECTS : SEE PORTFOLIO

SKILLS

- HTML & CSS
- PYTHON
- JAVA, C, C++
- Familiarity with testing and project structuring
- MYSQL
- POWER BI
- APIs IA
- Data analysis and visualization
- Images processing (HALCON)
- NumPy, OpenCV (skills currently being deepened)
- Software development fundamentals: modularity, code readability
- Interest in deep learning and time series
- Project management
- Jira / Trello
- Computer vision (segmentation, detection)
